CONSENT FOR DILATION WHILE UNDER THE CARE OF OKLAHOMA MEDICAL EYE GROUP

Patient Name: _____

Dilation of your eyes is extremely important to thoroughly examine the overall health of your eyes. Without dilation, the doctor can only view a small portion of the back of your eye. By temporarily increasing the size of your pupil through dilation, the doctor has a better view of the inside of your eye, which is helpful to detect and evaluate cataracts, floaters, hypertensive, and/or diabetic retinal changes, and other ocular diseases and abnormalities.

Dilation requires multiple drops instilled into your eye(s). Dilation drops take approximately 10-20 minutes to dilate your pupils. Your distance vision may be slightly blurred, sensitive to bright lights, and reading up close will be blurry for 4 hours or longer. Due to light sensitivity, we provide disposable sun shades to make you more comfortable. Driving may be difficult after the examination.

I have read and understand the above necessities and benefits of a dilated eye exam.
